

The Academy of Sciences Malaysia (ASM), together with the Malaysia Open Science Alliance Working Group on Capacity Building & Awareness, is pleased to invite you to the Webinar on Citizen Science from Malaysia's Perspective.

At the heart of the Citizen Science concept is the involvement of people from all walks of life in research activities. Citizen Science calls for direct lay involvement in research to encourage active public involvement, citizen-driven, crowd-sourced, participant-led, participant-centric and participant-driven research. Since Citizen Science projects invite the public to participate in a scientific investigation, this also offers the public with fertile opportunities for science learning.

This Webinar on Citizen Science from Malaysia's Perspective will be held to highlight local successes and challenges in organising Citizen Science projects, and discuss the future direction of Citizen Science in this country.

WEBINAR ON CITIZEN SCIENCE FROM MALAYSIA'S PERSPECTIVE
